

EASY BORE SERIES (2 OR 3 POINT RETRACTABLE HOLE GAGES)

These rugged retractable bore gages are ideal for inspection on the shop floor or in the laboratory. They feature a series of 24 interchangeable heads and 2 handles to accommodate the complete range of diameters between .236" and 7.87". Special heads with application specific contact lengths can also be accommodated. Please contact us for details.

Easy Bore with pistol grip and optional stand part #F20336
Ultra protective housing part #EBG1

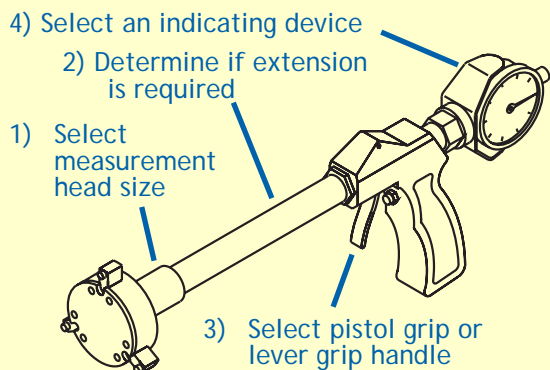

FEATURES

- All heads have fixed carbide anvils to eliminate operator error and setup misalignment
- Indicator pivots 360° and can be used in either left or right handed positions
- Separate indicating unit reduces cost and dramatically reduces repair down time
- Light weight impact resistant thermal isolating handle has provisions to mount gage on a stand which protects the gage from damage when not in use
- 3 point or 2 point contact available
- Available with digital or dial indicator or electronic probe
- Handle accepts either 8mm or .375" indicators

Easy Bore with lever handle

HOW TO ORDER:

*Indicator sold separately
