

FEATURES:

- Available with ISO 17025 certification
- •High amplification movement graduations as fine as .00005"
 - •Improves readability and minimizes judgement error
- •Lever principle of amplification minimizes effect of spindle sideshake
 - ·Linearity and repeatability maintained through millions of cycles
- •2-15/16" Bezel fits many existing fixtures, conforms to ANSI/AGD standards
- Adjustable gaging force easily adjusts from 2 to 5 ounces by externally accessible screw
- External zero adjustment knob makes possible the advantage of adjusting indicator hand to zero rather than rotating bezel to 'zero' hand
