

MODEL J2 HORIZONTAL JAW GAGE

www.dorseymetrology.com

The model J2 jaw gage features Dorsey's proven precision lapped chrome/steel bushing in a rigid steel frame. A series of interchangeable contacts and adjustable two axis rest stage along with a micrometer type adjustment tail stock combine to make the J2 jaw gage suitable for most high accuracy OD inspection tasks.

FEATURES:

- Check diameters, widths, lengths, and locations. Ideal for screw machine and small parts applications
- Specifically designed for Dorsey's high amplification dial indicators with graduations as fine as $.00002"$ (0.0005mm)
- Utilizes dial and digital indicators or electronic displays and is SPC compatible
- Standard thumb actuated retraction of $.100"$ makes part loading easy
- Tailstock fine adjustment of $1"$ maintains contact parallelism throughout the gaging range
- Interchangeable contact points are available for a variety of part configurations, each set of contacts utilizes a shank-lock design for maximum holding pressure
- Backstop for locating the part may be adjusted both horizontally or vertically to suit the part configuration

Gage shown features round carbide contacts (part #47950) and model #414-002 dial indicator (sold separately).
